

Hot Slapping series

SWV's visual character is a sharp edged design with a dynamic cutaway. The saddle pitch is 20mm compared to a standard 19mm pitch. This wide pitch creates comfortable slapping or pulling action. Super light and hard "A7075" aluminum is used in each saddle to support your rich and clear bass range. This aluminum is also used for F-1 racers and aircraft. The new circuit SB-1 is also specially designed to match the new SWV basses.
